To Parents and Caregivers

As you may know we have started our homework program this week. The students have been shown several times in class what is to be done for homework and how to access Connect, Reading eggs and Mathletics.

This year students will access their spelling homework through a Department of Education online program called Connect. The student’s username and password are stapled into the front of their homework book. Students will need to log onto connect using their details and then click on the tab that has ‘C2 Marshall’. Students will then find the discussion tab and open this to find the weeks spelling homework. It will consist of a spelling rule that has been taught in class and a list of 5 spelling words along with an activity which needs to be completed in their homework books. Homework will be checked every Friday morning.

Students will also have set Mathletics tasks to be done which I will check every Friday. Students will need to complete these tasks before they can assess the Mathletics Live page.

Please note, if you do not have access to the internet I will provide paper copies for the Connect homework and can make arrangements for the student to access Mathletics at an appropriate class time.

Students also have a Reading Eggs log in however, this is not part of our homework but is there to provide students with extra support for their reading.

Regular completion of homework will be required for students to be invited to the end of term homework reward.

If you have any questions please see me after school or make an appointment with me by phoning the front office.

Thanking you for your support

Haylee Marshall and Danielle Nolan
Classroom 1 and 2 teachers
