Dear Parents/Caregivers

At our school the outdoor environment is an extension to the classroom and with the cooler weather more of our learning will happen outside. This term we would like to continue the work completed last year in enhancing the outdoor learning spaces. To do this we need your support. We are hoping to achieve the following things in the next few weeks and would love any Dad’s, Uncle’s, Mum’s, Local businesses with the skills and materials to assist us in creating a dynamic outdoor environment for your children.

*We would like to complete our music wall- This requires attaching PVC pipes to a ply wood background and hanging it on the fence.

*We would like to build a new mud kitchen using wooden pallets- This will require power tools, screws, nails and experience in carpentry/construction.

*We would love to get some more vegetable patches growing- This requires donations of seedlings/ seeds, mulch etc.

*We would like to create a chill out zone and quiet reading area. - In this area we would like to create some seating for children out of pallets and construction of a tepee which we hope to grow some passion fruit vines over.

*We would like to create a ‘construction zone’ with gravel, trucks etc. – We will need a donation of a trailer load of gravel and tarpaulin/ large roll of black plastic to stop the gravel from escaping for this area.

*We would also like any parents who have time to come in and lacquer any of the wooden furniture created to make it weather proof.

Donations of: seedlings, seeds, rocks, glass beads, animals/fairies etc.

Any parents who have another way they think they are able to contribute please let your classroom teacher know. If you can support us in achieving any of the projects above please let your child’s teacher know when you’re free to come in and work on it!

Kind Regards

Early Childhood Teachers
