

Year 3 - C9

What's Happening ?

We have been busily rocketing into STEM this term with a link to our Earth Science curriculum and have been exploring concepts around

Space.

The class have also been trying their hand at convincing each other with study of Persuasive Writing. Our arguments are developing well about staying on Earth or moving to another planet!

A Note From Mrs. Bow

C9 has been focusing on building our classroom community over this term and are getting to know one another well. Our day starts with a focus on Social and Emotional Wellness and I am so impressed by the empathy and understanding that students display towards one another. It is shaping up to be a fantastic year already!

A Peek At What We Have Been Learning

Reading: So far this year in Reading we have been looking at the comprehension skills of Connecting, Visualising and Questioning as well as improving our decoding skills for increased reading fluency.

Writing: While our focus has been on Persuasive Writing so far, this week has seen a turn into creative writing as we move into Narratives. Bring on the imaginations!!!

Maths: We have been extending our understanding of Number exploring place value into the 10,000's and looking at Problem Solving and Addition and Subtraction strategies.

Science: When Night turns into Day and the Earth rotates on its axis around the Sun and shadows fall on the Earth, we have "revolutionised" our Scientific understandings this term!

H.a.S.S.: Our beautiful sunburnt land Australia has been our area of study, in particular the human and natural features of this great wide land of ours and students have created a fantastic map of the primary locations.
