

Year 6

C12

One Last Year of Tricks in Year Six!

It's our final year at Baynton West and the Year 6's in Room 12 are making it their best year yet! As a class we have been focusing on how to be exceptional leaders for our school. Our main focus for the beginning of this year has been to challenge ourselves by setting goals, both personal and academic, to help us achieve our full potential and to be the best version of ourselves.

A Sneak Peek Into Our Learning

Reading: We have been working on our skills of Summarising and Determining Importance. We have focused on being able to discuss the key information from a text and are working on our ability to summarise information using our own words.

Writing: In Term 1 we focused on our narrative writing with our task being to write a story with a moral. We came up with some amazing morals including; face your fears, never give up, don't judge a book by its cover and you'll never know if you never go.

Maths: Times tables, times tables and more times tables! To be fluent in our times tables, from the ones all the way to twelves, is a BIG focus in Room 12. In Term 2, we are looking into the connection between decimals, fractions and percentages.

HASS/Science: WOW! Term 1 saw us complete a huge project that integrated our Geography topic of Asia, with our Science topic of Natural Disasters. We researched the impact that natural disasters have on communities and the environment, whilst also showing our ICT skills by presenting this information using Microsoft PowerPoint.
