

The Year so far in C13

It's been quite an educational journey in C13 this year, with plenty more to come. We have jumped straight into our learning this year with great enthusiasm. In HaSS, we have educationally travelled through the Asian continent, learning about the geographical and cultural differences features of many countries. We even had a Year 6 party to celebrate the Chinese new year!

In Science, we have developed an understanding of how Natural disasters occur and the effect they have on the Earth. In C13, we have some real scientific geniuses with a great understanding of this specific topic.

In Maths, we have been building upon our knowledge of numbers and applying them to everyday situations. We love learning about fractions decimals and percentages in C13.

In English, we enjoy seeing progression in our writing through the Talk for Writing program and have produced some outstanding results.

Such a big year ahead with many exciting events as we continue to prepare for.....High School!
