

As part of Geography we have begun learning about the 7 Continents and 5 Oceans. We started by filling out passport application forms and lodging them at the post office. We learned that you need to fill in your forms carefully or they can't be processed.

We have been having lots of messy fun creating our own papier mache globes. Some of us thought the feeling of the flour and water mixture was quite disgusting!

Here we are working collaboratively to complete a 500-piece puzzle of a world map. Not only are we learning about the continents but how to work together and problem solve.

C3 and C4 Explore the Continents!

As part of our Science and Design Technology studies in C3 and C4 we have been learning about the needs of living things and how living things grow and change. We have also been looking at where our food and clothes come from.
